Objective of the Project

- -Make reports on Business Flows, Standard Development Life Cycle and Financial Benefits
- -Competitor Analysis of Our App(TickTake), List of Competitor Apps and their features
- -Analysis Tick-Take App Overall Final Task

• Taha Mir: UI design.

- Initialized the UI for our mobile app project by crafting the look and feel (UI design) from concept to implementation.
- Primary focus was on creating a visually appealing, and user-friendly interface across all pages.
- Co-operated with the front-end coders to give them icons and design samples to make their workload somewhat easier.

Mustassum Tanvir: Frontend Developer

- -Made Login and Signup Up
- -Made Animations, Set up Values like Strings, Colors, Themes Button Gradients, etc.
- -Set up the basic functionality of the app.

Ahmad Irfan: Frontend Developer

- Made user events page, favorite events page, user bookings page, bottom navigation, fragments to control navigation, categories page, event cards
- Setup user side UI elements

M.Ghulam Hamza: Backend developer.

- write MySQL queries for each entity, add the primary keys and link the entities together with the help of foreign key(s).

• Abdul Majid: Frontend-Developer

- Created Event pages such as favorite events and view past events.
- Helped other front-end developer doing their minimal tasks.

• Syed Kaif Ali: Project Manager

- Gathered the required information and briefed it to the team.
- Created timeline and kept record of the progress.
- Created a role Dependecy document.
- Created group project report.
